What you like to refer this training to your friends/colleagues?							It was very informative and helpful to become an APPS DBA
Did Training meet your expectations?							At the end of the session, I was very clear on the activities that APPS DBA perform in the maintainance world.
Is there anything else you would like to suggest?							Nice to practice it on Single and Multi node environments. Provide them to future students if possible. Cloning practice session would go smooth if you have this kind of environment.
Further Comments							Overall was awesome.
